### Product Details

For advanced patient care, choose the Access High-Low exam table. This chair-to-table design transitions patients smoothly from consultation to examination without requiring weaker or pained patients to get up and move. Ideal for examination rooms in private practice or larger facilities, this table provides maximum storage and work space rolled into one. From oncology to gynecology, this patient table will help patients stay comfortable and facilitate the work of medical professionals.

Constructed with seamless, stain-resistant vinyl upholstery that cleans well and won't harbor microbes, this patient table has a 700 lb weight capacity and a reliable, durable design that is both easy to operate and easy to service. Patient transfer grab bars come standard, and the simple yet intuitive design allows patients to comfortably support themselves while getting on or off on the table. The swing-arm design also accommodates those moving from wheelchair to table. The arms can also be removed for easy patient access. The most unique feature of this patient exam table is its ability to go from a chair to table position, all using a simple anti-tamper on/off switch that prevents accidental movement. The chair sits at a comfortable 18"H, and when fully extended it measures 78"L and 28"H. Adjustable stirrups come standard to facilitate gynecological and pelvic exams. Storage isn't a problem as this table includes two pass-through side drawers (22.6"W x 20.2"D x 7"H each) that are accessible on both sides and an additional spacious front drawer (19.8"W x 19.2"D x 3.8"H). Hospital gowns, boxes of gloves and smaller supplies can be easily stored on hand, and a convenient covered paper roll storage area holds up to six rolls (23"W x 23"D x 3.25"H). A slide-through holder accepts 21"L x 3"H and 18"L x 3"H paper rolls. As an added touch, a pass-through work surface can be extended on either the left or right side as a way for doctors, physician's assistants or nurses to set down charts, instruments or prepare for a procedure. This space-saving work surface eliminates the need for external stands or trays and contributes to a cleaner, less cluttered exam room.

This patient table runs on 115VAC, 60 Hz, 5.8 amps max, and uses safe, low voltage actuators and a single, detachable power cord. This product comes with the manufacturer's three year warranty, and is non-returnable. Ships fully assembled.
