Product Details

The TechTub trolley comes with storage for 24 iPads, Chromebooks or other devices so that instructors can easily transport, charge or store the technology they need for their class. Great for K-8th grade classrooms, this trolley can be rolled from a storage closet to a classroom with ease. Both TechTubs lock to discourage unauthorized access, and it reduces the hassle of dealing with multiple charging cables while trying to teach a class.

This TechTub trolley is constructed with four TechTubs, and has durable 3" casters and two sturdy handles for easy transportation. Cable management on the back keeps pesky cables out of the way, and a 10 outlet internal power strip facilitates device charging once you've reached your destination - be it a classroom or an IT storage closet. Inside, adjustable dividers keep iPads, Chromebooks and other devices with or without cases separated and neatly stacked. The TechTubs can be broken apart with clips if smaller transportation size is needed.

Assembly required.
