Product Details

Do you ever wonder where your milk bottles go when you put them in the recycling bin? You'll be pleased to know that your recycling efforts are paying off! To make this wheelchair accessible hexagonal picnic table with a plaza design, Polly Products used approximately 1,800 recycled milk bottles. Polly Products' Polly Planks are made from high density polyethylene and are meant to resemble wood in weight and texture.

Eco-friendly and economic, this hexagonal picnic table has a 78.5" diameter footprint and is made of 100% recycled plastic, held together with stainless steel fasteners, and features an built in umbrella holder. Each bench features two 25.6875" long and 9.5" wide seats and the table top measures 45.25" at its widest point and 40" at its narrowest point. Wheelchair opening measures 40" wide and 27.5" high. Resistant to rotting and splintering, this picnic table will give you years of maintenance-free use far beyond a traditional wood picnic table.

Assembly required.
